The science of Cymatics vividly demonstrates how inert substances can be “brought to life” when stimulated by audible sound frequencies.

- Witness powders, pastes and liquids transforming into lifelike, flowing forms—assuming the same complex geometric patterns that appear throughout the natural world, and in the art and architecture of the world’s wisdom traditions.
- View a striking new array of Cymatic imagery from Romanian artist and pioneering researcher, Gabriel Kelemen, Ph.D.
- Gain insights into the unseen, yet universal dynamic process that shapes our world, from the microscopic to the macrocosmic.
- Challenge yourself to consider how these basic universal principles shape your very life!

Time for conversation follows the presentation. An assortment of Cymatics books and DVDs will be on hand, as will a copy of Kelemen’s brand new book, *The Universality of the Vortex-Sphere Archetype*!

To view examples of Kelemen’s illustrations and astounding Cymatics images, please visit: [http://www.cosminnasui.com/2013/12/gabriel-kelemen/](http://www.cosminnasui.com/2013/12/gabriel-kelemen/)

Jeff Volk is a poet and an award-winning video producer, with over 30 years popularizing this amazing science. He published the seminal works of Hans Jenny, who coined the term *Cymatics* (from the Greek word for “wave”), and throughout the 1990’s, he produced the first conferences on Cymatics and sound therapies. Over the past decade he has promoted the innovative work of contemporary European researchers, such as Alexander Lauterwasser, whose book *Water Sound Images* he published in 2006, and Gabriel Kelemen, who he’ll be bringing to the States for the first time, to present at the Tenth International Cymatics Conference in Atlanta, November 5 - 8. Jeff has given hundreds of workshops and presentations throughout North America and Europe, and his articles have been published worldwide.
